FIRST AID

ACCIDENTS CAUSED DUE TO ACIDS

BODY BURNS

Wash with plenty of water first and then with Sodium bicarbonate solution. After the wash, apply a paste of Sodium bicarbonate, petroleum jelly mixture on the burnt part of 10-15 minutes. Again wash with plenty of water and apply caron oil (An equal quantity of Lime water and Linseed oil).

SPILLAGE IN THE EYES:

Wash with plenty of water first and then with 2% Sodium bicarbonate solution followed by water again. Wipe out the water from your eyes and then put 2-3 drops of Olive oil.

SPILLAGE OF CLOTHES:

Use dilute Ammonia solution to neutralise the acid. Then wash with plenty of water.

ORAL INTAKE:

Gargle with water first and then drink atleast 1 litre of milk or water followed by lime juice.

ACCIDENTS CAUSED DUE TO ALKALI:

BODY BURNS:

Wash with plenty of water first and then with Boric acid solution. Make a paste of Boric acid, apply on the burnt part and after 10-15 minutes wash it off.

SPILLAGE IN THE EYES:

Keep open the eyelids and wash with plenty of water first and then with dilute Boric acid solution (0.5%). Again clean your eyes with water. Wipe out the water and then put 2-3 drops of olive oil.

SPILLAGE ON CLOTHES

Neutralise the alkali with dilute Acetic acid solution (3%) - Then wash with plenty of water.

ORAL INTAKE:

Gargle with water first and then drink at least 1 litre of milk or water. Eat oranges.

BURNS CAUSED BY BROMINE:

Wash the burnt part with either alcohol or Petrol and then apply Olive oil.

BURNS CAUSED DUE TO FIRE:

Apply either Petroleum jelly or Burnol on the burnt part.

WOUNDS:

First remove any foreign particle (like glass pieces etc.) from the wound. Clean well with water and apply Tincture iodine, put a bandage and seek medical attention.

GENERAL ADVICE:

- For severe burns caused due to acid keep the burnt part in sodium bicarbonate- Petroleum jelly mixture and for those burns caused due to alkali, keep in the boric acid solution for at least half an hour.
- While packing compounds of cobalt, Chromium, Cadmium, Bismuth, Barium, Lead, Tin etc., it is necessary to wear the respective safety equipments/ guards (like gloves, goggles, face mask etc.). In case these chemicals are accidentally consumed, try to spit it out even by vomiting.
- While packing formaldehyde or Hydrogen peroxide, if it falls on the body or clothes, wash with plenty of water.
- If copper Sulphate is consumed accidentally, drink a cup of warm water containing a spoon of sodium chloride or Zinc sulphate.
- It is the duty of everyone to ensure that chemicals do not come into contact with the body through their mouth, eyes, ears & nose. Also ensure that the necessary safety equipments are used.
- After providing first aid seek medical attention, if necessary.

FIRE:

Do not use water to extinguish an electric fire as it could give you a shock. Use dry powder fire extinguishers.

If solvents lighter than water (like Xylene, Benzene, Acetone, I.P.A., Methanol, Petroleum ether, Diethyl ether etc.) catch fire, use wet blanket to cover the fire or use suitable fire extinguisher. Splashing water on such fire could spread the flame. Be familiar with the usage of various types of fire extinguishers.

HAZARD SYMBOLS

FLAMMABLE

Hazard: Flammable when exposed to heat, fire or sparks, or give off flammable gases when reacting with water. Ignition sources should be avoided.

Caution: Store in cool places. Keep away from open flame, source of heat and sparks.

IRRITANT

Hazard: This symbol designates substances which may have an irritant effect on skin, eyes and respiratory organs.

Caution: Avoid inhalation and direct contact with body.

DANGER

Hazard: May irritate the skin, or exhibit minor toxicity. The chemical should be kept away from the skin and the eyes as a precaution.

Caution: Avoid contact with the human body and immediately consult a doctor in cases of malaise.

EXPLOSIVE

Hazard: May explode as a consequence of fire, heat, shock or friction. Chemicals with this label should be kept away from potential ignition sources.

Caution: Avoid shock, friction, sparks and heat.

DANGEROUS FOR ENVIRONMENT

Hazard: Indicates substances that are toxic to aquatic organisms, or may cause long lasting environment effect. They should be disposed of responsibly.

Caution: Depending on the risk potential do not allow to enter sewerage system, soil or environment. Observe special disposal regulation.

CORROSIVE

Hazard: May causes burns to skin and damage to eyes. May also corrode metals. Avoid skin & eye contact, and do not breathe vapours.

Caution: Do not breathe vapours and avoid contact with body and clothings.

OXIDISING

Hazard: Burns even in the absence of air, and can intensify fires in combustible materials. Should be kept away from Ignition sources.

Caution: Keep away from air and moisture.

GAS CYLINDER

Hazard: Container contains pressurised gas. This may be cold when released, and explosive when heated. Containers should not be heated.

Caution: Protect from sunlight. Store in a well ventilated place.
